

ARCHITECTS OF THE GAME

**KANSAS CITY:
THE SPORTS DESIGN CAPITAL OF THE WORLD**

Welcome to Kansas City. And welcome to the heart of global sports design.

Kansas City is the worldwide home of sports architecture. More sports venues are designed here than anywhere else on Earth. Chances are, the stadium in your own hometown or country was designed by a Kansas City firm.

Scan the QR code to meet the designers behind the world's stadiums. As you enjoy the matches and explore our city, we invite you to discover the Kansas City people and firms that shape stadiums, cities, and fan experiences around the world.

Our thanks to Irwin for their enthusiastic support of this project and to our members who have made this project a reality.
